交付決定額(研究期間全体)：(直接経費) 2,600,000円

研究成果の概要(和文)：本研究は、視覚資料、GISマッピング、キーインフォーマントインタビューを用いて、紛争後のフィリピン・マラウィ市の選択した都市部における物理的・象徴的変容を体系的に調査した。この研究プロジェクトを通じて、地方と都市の両視点を組み合わせた概念的枠組みをつくることができ、紛争後の都市に関する今後の研究アジェンダを設定することにもつながった。また、本研究の成果は、平和構築の様々な要素を分析する際に、視覚的・空間的な考察をどのように統合するかについて、今後の研究に役立てることができる。また、紛争後の復興に向けた都市空間の社会的利用をどのように考慮するかについて、政策的な示唆を与えるものである。

研究成果の学術的意義や社会的意義

The research results can inform future studies on how to integrate visual and spatial considerations when analyzing peacebuilding. The results can also inform policy recommendations on how to consider the social use (and misuse) of urban spaces for post-conflict reconstruction and peacebuilding.

研究成果の概要(英文)：Using visual documentation, GIS mapping, and key informant interviews, the researcher systematically examined the physical and symbolic transformation of selected urban sites in post-conflict Marawi City in the Philippines. Through this project, a conceptual framework that combines both local and urban perspectives will set a research agenda for future research on post-conflict cities. The research results can also inform future studies on how to integrate visual and spatial considerations when analyzing various components of peacebuilding. The results also have policy implications for national and local governments, non-governmental organizations, and aid donors on how to consider the social use (and potential misuse) of urban spaces for post-conflict reconstruction. The results of this project have been presented at an international conference and will be published in two research articles, opinion editorials, a publicly accessible geoportal, and a short video documentary.

研究分野：International Relations

キーワード：peacebuilding local peacebuilding urban peacebuilding Marawi City Mindanao Philippines

### 1. 研究開始当初の背景

The researcher has previously conducted research on post-conflict peacebuilding. In 2019, two years after the Battle of Marawi, the researcher visited the most-affected area of the city to investigate the physical devastation and observe the slow pace of the city's rehabilitation. She established connection with researchers and government agencies and understood that several key sites have been identified by the government as priorities for rehabilitation. Surrounding this prioritization and despite the pouring of national funding and international support is the apparent dissatisfaction of ordinary people who were displaced and unable to return to their homes. These conditions led the researcher to combine local and urban perspectives in understanding the challenges to Marawi's post-conflict peacebuilding.

### 2. 研究の目的 (Purpose of research)

How do urban spaces and places contribute to peace and conflict? The project aimed to answer this question by drawing on local peacebuilding studies and urban studies. The researcher examined the social use of urban spaces in relation to peace formation and conflict promotion in Marawi City in the Philippines. Marawi City is still in the process of rebuilding after the five-month-long battle between Islamic State (IS) militants and government forces in 2017. Several key sites within the city—from places of worships to bridges and markets—have played crucial roles before, during, and after the conflict. Using visual documentation, GIS mapping, and key informant interviews, the project systematically examined the physical and symbolic transformation of selected urban sites.

### 3. 研究の方法 (Method of research)

The researcher employed two phases of data collection and analyses. The first phase is a visual documentation of the urban spaces and places that have played a role in the conflict and peacebuilding process of Marawi. Photos before, during, and after the conflict were collected and compared. Aerial videos and short interviews of ordinary people talking about the selected sites were also recorded. These materials were overlaid on a Geographic Information System (GIS) map of the selected sites.

The second phase is the collection of qualitative data. Instead of a focus group discussion, which was restricted due to COVID-19 restrictions, the researcher collected interview

data from 29 key informants with previous or continuing engagements in Marawi City. The interviews centered around the security, justice, and development aspects of the city's rebuilding process to reveal local perspectives in urban peacebuilding.

#### 4. 研究成果 (research result)

The results of this research show that before the Battle of Marawi, the urban sites were integrated into the everyday life of Meranaws. However, during the rebuilding process, the sites became instrumental to the government's narrative of peace and development, demonstrating the need to better incorporate the needs and views of ordinary people. These results suggest that post-conflict rebuilding must consider both local ownership and urban spatialities of peacebuilding. The results of this project have been presented at an international conference and will be published in two research articles, opinion editorials, and a short video documentary. A geoportal was also created to share the historical background and physical transformation of the selected urban sites in Marawi City.

The academic value of the research results is the setting of a research agenda for visualizing peace and conflict. It can inform future studies on how to integrate visual and spatial considerations when analyzing various components of peacebuilding. Combining the local and the urban in a coherent framework is the novel contribution of the research to future academic studies. The results will also inform policy recommendations for national and local governments, non-governmental organizations, and aid donors on how to consider the social use (and potential misuse) of urban spaces for post-conflict reconstruction and peacebuilding.

5. 主な発表論文等

〔雑誌論文〕 計0件

〔学会発表〕 計1件（うち招待講演 0件 / うち国際学会 1件）

1. 発表者名 Dahlia Simangan
2. 発表標題 Urban peacebuilding in Marawi City, Philippines: People, Places, and Practices
3. 学会等名 International Studies Association Annual Convention (国際学会)
4. 発表年 2021年
